

REPORT TO SHASTA COUNTY RTPA

SUBJECT	MEETING DATE	ITEM NUMBER
Shasta <i>FORWARD</i> >> Regional Blueprint: Approval of Alternative Scenarios with Modeling Outputs and Amendments to Agreements with Moore & Associates and Dowling Associates	7/28/09	9

RECOMMENDATION

It is recommended that the Board:

1. Approve the 'Current Trend' and alternative scenario A, B and C modeling outputs, narratives, and performance measures as presented in the attached 'Scenarios Brochure';
2. Direct staff to proceed with Phase II of the public outreach process, or scenario voting period;
3. Amend the Agreement with Moore & Associates to add up to \$40,000 for additional communication and marketing services; and
4. Amend the Agreement with Dowling Associates to increase the on-call services budget by an additional \$30,000 for travel demand and air quality modeling.

SUMMARY

Modeling of the 'Current Trend' and Board-approved alternative scenarios is complete. Pending Board approval, results will be made available for public review. Shasta County residents will be asked to vote for their favorite scenario during Phase II of the public outreach process. Input will be used to develop a 'preferred regional growth vision'. A final report and recommendations will be presented for Board consideration in December.

Existing Agreements with Moore & Associates and Dowling Associates require an amendment to augment budgets based on the latest Blueprint grant award for ongoing work tasks related to communication/marketing and technical travel modeling respectively.

DISCUSSION

Shasta *FORWARD*>> Project Update – In addition to the previously completed 'Current Trend' scenario, the following three community-driven alternative growth scenarios were presented to the cities and County and approved in conceptual form by the Board on February 24, 2009:

- Scenario A: Rural & Peripheral – focuses on the character and aesthetics associated with rural living;
- Scenario B: Urban Core & Corridors – focuses on the benefits of urban living without sacrificing the closeness and accessibility of Shasta County's unique natural setting;
- Scenario C: Distinct Cities & Towns – focuses on maintaining individual community identity and a strong sense of place.

The 'Current Trend' and alternative scenario A, B and C are now complete and ready for Board review. A full description of all scenarios is arranged for examination and comparison via 'Attachment A: Scenarios Brochure'. The Shasta *FORWARD*>> Technical Advisory Committee (TAC) and Steering Committee have provided multiple stages of review and input and recommend RTPA approval as presented.

Pending Board approval, notable public outreach activities planned for Phase II include the following:

- Distribution of approximately 37,000 Scenarios Brochures via newspaper inserts, library displays, and a variety of community locations;
- 30-minute KIXE-TV program (premiers August 24, followed by encore presentations throughout September);
- Mass media advertising including radio (KQMS), print (Redding Record Searchlight, Anderson Valley Post, Shasta Lake Bulletin, Intermountain News, Mountain Echo, Ridge Rider), and public service announcements;
- Project website (www.shastaforward.com); and
- Community open houses to be held in Anderson, Shasta Lake, Redding, and Burney.

Public input received will be used to develop a 'preferred regional growth vision'. Draft results, findings, and recommendations will be presented at a wrap-up summit later this year. A final report will be presented for Board consideration at the February 2010 Agency meeting. Pending Board approval and further direction, individual agency presentations will be scheduled thereafter.

Consultant Agreement Amendments

Additional funding support through the Regional Blueprint Program FY 2008/09 grant cycle has allowed for further work related to Shasta*FORWARD*>>. The following consultant agreements require amendment:

- Moore & Associates: Amend to augment public information and communication efforts, including production, design, printing, and regional distribution of print media. The attached Third Amendment adds \$40,000 to the existing amount of \$242,649.
- Dowling Associates: Amend to add \$30,000 for additional travel modeling required to calculate transportation system capacity and expansion needs under the 'preferred regional growth vision' and for general regional travel model maintenance in support of all transportation planning activities and air quality conformity. The attached Second Amendment adds up to \$20,000 from the FY 2008/09 Regional Blueprint grant plus an additional \$10,000 in FHWA metropolitan planning (PL) funds to the existing amount of \$20,000 for on-call services.

ALTERNATIVES

The Board may choose not to approve alternative scenario modeling outputs as presented, or may conditionally approve with specified changes. Substantial changes may necessitate further consultation with the Shasta*FORWARD*>> TAC and Steering Committee as well as an extension of the current project schedule.

Regarding the consultant agreement amendments, the Board may direct staff instead to prepare a request for proposals (RFP). This is not recommended as needed services are not new tasks, but rather an intensification of the current Agreement's work tasks made possible through the latest Blueprint grant award. No additional amendments are anticipated.

OTHER AGENCY INVOLVEMENT

The Shasta*FORWARD*>> project study area encompasses all of Shasta County, including each city, the county, and all other entities interested in transportation and regional growth. The California Department of Transportation and the Federal Highway Administration provide grant funds.

FINANCING

FHWA PL funds in the amount of \$10,000 will be used for general upkeep of the Shasta County Travel Model. All other efforts referenced in this report are funded up to 80% through California Regional Blueprint Planning Program grants in amount of \$715,000 (\$375,000 was awarded to the RTPA in FY 2006/07, \$140,000 in FY 2007/08, and \$200,000 in FY 2008/09). The 20% required match funds are budgeted in the OWP, using State Planning, Programming, and Monitoring (PPM) funds. Grant funds expended to date for Shasta*FORWARD*>> equal approximately \$425,000.

A handwritten signature in black ink, appearing to read 'Daniel S. Little', is written over a horizontal line.

Daniel S. Little, AICP, Executive Director

DSL/DTW/jac

**THIRD AMENDMENT TO AGREEMENT BETWEEN
SHASTA COUNTY REGIONAL TRANSPORTATION PLANNING AGENCY AND
MOORE & ASSOCIATES TO INCREASE BUDGET FOR PUBLIC INVOLVEMENT
SERVICES RELATED TO ShastaFORWARD>>**

This Third Amendment is entered into between the Shasta County Regional Transportation Planning Agency ("RTPA") and Moore & Associates ("Consultant").

RECITALS

WHEREAS, the RTPA and Consultant have previously entered into an Agreement on June 26, 2007, for public involvement services related to ShastaFORWARD>>; and

WHEREAS, a FY 2007/08 grant from the California Regional Blueprint Planning Program was awarded to augment tasks currently underway; and

WHEREAS, the RTPA and Consultant desire to amend the Agreement to increase the budget by an additional \$40,000 for public involvement services,

NOW, THEREFORE, the Agreement is amended as follows:

Section 3, Compensation, shall be amended to add subsection 'E', to read as follows:

"Consultant shall be compensated for time and expenses related to additional public involvement services as directed in writing by the RTPA, not to exceed \$40,000."

I. REAFFIRMATION.

In all other respects, the Agreement, as amended, remains in full force and effect.

II. ENTIRE AGREEMENT

This Agreement, as amended, and any attachments hereto, constitute the entire understanding between RTPA and Consultant concerning the subject matter contained herein.

III. EFFECTIVE DATE.

This Third Amendment shall be effective on the date it is signed by both parties.

IN WITNESS WHEREOF, the parties hereto have executed this Third Amendment to the Agreement.

**SECOND AMENDMENT TO AGREEMENT BETWEEN
SHASTA COUNTY REGIONAL TRANSPORTATION PLANNING AGENCY AND
DOWLING ASSOCIATES, INC. TO INCREASE ON-CALL SERVICES BUDGET**

This Second Amendment is entered into between the Shasta County Regional Transportation Planning Agency ("RTPA") and Dowling Associates, Inc., ("Consultant").

RECITALS

WHEREAS, the RTPA and Consultant have previously entered into an Agreement on November 11, 2007, for on-call support of the Shasta County Traffic Model; and

WHEREAS, the RTPA and Consultant amended the Agreement on December 18, 2007 to increase the budget by an additional \$10,000 to support RTPA staff model coordination; and

WHEREAS, the RTPA and Consultant desire to amend the Agreement to increase the budget by an additional \$30,000 to support RTPA staff in model coordination,

NOW, THEREFORE, the Agreement is amended as follows:

Section 3, Compensation, shall be amended to add subsection 'B', to read as follows:

"Consultant shall be compensated for time and expenses related to additional on-call services as directed in writing by the RTPA, not to exceed \$30,000."

I. REAFFIRMATION.

In all other respects, the Agreement, as amended, remains in full force and effect.

II. ENTIRE AGREEMENT

This Agreement, as amended, and any attachments hereto, constitute the entire understanding between RTPA and Consultant concerning the subject matter contained herein.

III. EFFECTIVE DATE.

This Second Amendment shall be effective on the date it is signed by both parties.

IN WITNESS WHEREOF, the parties hereto have executed this Second Amendment to the Agreement.

YOUR REGION. YOUR SCENARIOS. YOUR TURN TO CHOOSE...

BUILDING CONSENSUS >>

Shasta County's population will swell from 180,000 residents today to over 330,000 residents by the year 2050. Inside you will find four unique approaches for accommodating growth and development, called 'scenarios'. The 'Current Trend' scenario represents Shasta County in the year 2050 given current trends, policies, and practices. Scenarios A, B, and C are community-generated alternative growth scenarios.

The following maps, descriptions, and performance measures paint a picture of what each future scenario might look like, highlight the trade-offs between different strategies, and help residents measure the impacts on daily living.

Picture yourself in each scenario and then tell us what you think using the attached ballot. Your input will be used to build a "Preferred Regional Growth Vision" for Shasta County. For additional information and/or to submit your vote online, visit shastaforward.com.

Existing Conditions >>

Map Legend >>

	New Development		Urban Center		City Boundary
	Existing Developed Land		City Center		County Boundary
	Undeveloped Open Space		Town Center		Waterbody
	Conservation Lands		Community Center		Highway

1. Redding	6. Shingletown	11. Fall River Mills
2. Anderson	7. Palo Cedro	12. Millville
3. City of Shasta Lake	8. Bella Vista	13. Whitmore
4. Cottonwood	9. Happy Valley	14. Round Mountain
5. Burney	10. Oak Run	15. Montgomery Creek

Over 1,700 local residents weighed in during Phase I of the ShastaFORWARD>> Regional Blueprint process. The conclusion - we love Shasta County. We love the closeness and accessibility of our natural surroundings. We work hard to make a living here because there's no place we would rather be. We're more interested in growing up as a region than we are in simply growing bigger. Many of us were born and raised in the region. In recent years, many more have discovered Shasta County and are busy laying down new roots. Collectively, we all feel a vested interest in the future.

We're also concerned. Growth and development is tied to economic progress and opportunity, but at what price? We're mobile, but it's getting harder to move around. Our air and water are clean, but may not always be so. Our cost of living fluctuates with the latest price at the pumps. We're independent and self-reliant, but also strong-willed - sometimes divided. We share values and usually agree on the problems, but not always the solutions. We've seen how other regions throughout California are growing and sometimes worry if this could happen here.

But we're starting early. We can shape the future without having to undo the past. We can strike a balance between progress and tradition. First we must build consensus.

- ☒ Step 1 - Determine the values and priorities we share as a region (see Community Values & Priorities chart below).
- ☒ Step 2 - Compare community values and priorities against the 'Current Trend' model - what Shasta County will be like in the year 2050 under existing plans, policies, and practices.
- ☒ Step 3 - Develop a range of potential alternative strategies (called 'scenarios') for accommodating growth and development in a way more closely aligned with local values and priorities.
- ☐ Step 4 - Utilizing existing conditions as the baseline and local values and priorities as the measuring stick, you're now invited to explore and contemplate which scenario best reflects your ideal vision for the future of Shasta County. For additional information about ShastaFORWARD>> and the following scenarios, visit us online at www.shastaforward.com.

Community Values & Priorities >>

For a complete description of each priority, please see the 'Community Values & Priorities Assessment' report available online at www.shastaforward.com.

Current Trend Scenario >>

The 'Current Trend' scenario is based on present-day plans, policies, and practices projected into the future. Over time, the I-5 corridor and surrounding areas blend into one large metropolitan area. Much of what has traditionally been considered open space in the valley floor gradually disappears as undeveloped land becomes developed. Except for a few rural towns, the intensity of development fades as the distance from I-5 increases.

The places people live and the places people go are generally separated. Redding and a handful of commercial and industrial sites along I-5 continue to be the center of economic activity and employment. Retail development is grouped in large, regional centers near freeway on/off ramps and at major intersections. Residential development gradually expands outward at the urban fringe. Every so often, a large multi-thousand home tract changes the landscape more abruptly.

I-5 and regional highways are increasingly relied upon for routine trips. The vast majority of transportation investments focus on maintaining these roadways and fixing congested bottlenecks as resources permit. The general appearance and quality of life in the region inch closer to other metropolitan areas throughout California.

Projected Land Use Pattern (2050)

What are the implications? >>

- >> Despite the status quo policies and practices, the net effect on Shasta County's form, function, and livability is anything but business-as-usual under the weight of future population projections.
- >> Nearly one-half of all land area in the valley floor and foothills is developed. The remaining half are those lands that are most problematic and/or expensive to develop due to environmental impacts, lack of ground water, or distance from existing infrastructure.
- >> Vehicle miles traveled per household jumps from 34 to 65 miles per day. A near doubling of automobile CO₂ emissions is at odds with current environmental and climate change laws. Failure to comply with state laws will lead to litigation, eventually restricting Shasta County's freedom to grow and develop as a region.
- >> The 'Current Trend' is the most predictable and politically expedient option in the short term, as only incremental changes in local policies and practices are required.

9% neighborhood

2% urban

89% large lot development

How Land is Used >>

Scenario A - Rural & Peripheral >>

'Scenario A' focuses on the character and aesthetics associated with rural living. Growth and development is spread throughout the region rather than confined to cities and towns. Lot sizes grow substantially, but all new growth and development is accommodated within Shasta County's existing General Plan. A slower pace of life, rural landscapes, and ample elbow room between neighbors take priority over urban living and a wide range of housing options.

Low density, low rise homes and buildings help new development blend in with Shasta County's natural landscape. Although some small-scale commercial development exists near residential areas, there is a clear and deliberate separation between residential and non-residential areas. Employment and commercial centers are located at freeway on/off ramps and major intersections for easy access by automobile.

Transportation investments focus on expanding rural roadways into outlying areas to allow for more low-density residential development and to keep existing rural communities from being overrun by new growth. Additional other transportation investments such as public transit are limited to existing urban areas as needed.

Projected Land Use Pattern (2050)

What are the implications? >>

- >> An increase in large lot residential development achieves rural character and aesthetics over functionality. Nearly one-half of the region's prime agricultural lands are developed or subdivided into parcels not practical for commercial food production.
- >> Water consumption is higher on a per household basis due to larger lot sizes, but overall consumption is lowest as a result of existing agricultural land being converted to urban uses.
- >> Nearly four times as many acres of environmentally sensitive lands are impacted by new development compared to the Current Trend scenario. Large lot development helps reduce the severity of impacts, but the threat of wildfire in developed areas is high.
- >> Increased vehicle emissions affect air quality, leading to increased incidence of respiratory and other chronic diseases.
- >> Low density and far distances limit mobility options. Vehicle miles traveled per household balloons from 34 to 104 miles per day. Mobility and the cost of travel are highly susceptible to fluctuations in fuel prices.

How Land is Used >>

Scenario B - Urban Core & Corridors >>

'Scenario B' focuses on the benefits of urban living without sacrificing the closeness and accessibility of Shasta County's unique natural setting. Conceptually, this scenario resembles a 'hub and spoke' development pattern. Employment, commerce, and regional destinations are focused within an urban 'hub'. Radiating outward along a select number of transportation corridors or 'spokes', are linear communities containing a mix of multifamily housing, townhouses, neighborhood commercial, and traditional neighborhoods.

The area of developed land in the regional core stays about the same size as today, but previously passed over and underutilized land is filled in over time. Residents travel in and out of the urban core for work and regional shopping, but have access to routine goods and services close to home. Between urban corridors, a network of interconnected open space enhances the connection between urban and natural areas. A regional trails network provides access to open space and doubles as non-motorized transportation corridors to and from the urban core.

By concentrating new development along select corridors, miles of additional new roadways are greatly reduced. More focused investments in public transportation, bicycling, and walking facilities along the urban corridors make transportation options more accessible and convenient to use. Public infrastructure is likewise combined along these key corridors to help reduce housing costs. Large lot development continues to occur, but is grouped together at the end of urban corridors.

Projected Land Use Pattern (2050)

What are the implications? >>

- >> By locating large lot development outside and away from the valley floor, nearly 2,500 acres of prime agricultural lands are preserved and over 21,000 fewer acres of environmentally sensitive lands are impacted versus the 'Current Trend' scenario.
- >> Development patterns in 'Scenario B' are similar to the 'Current Trend' scenario, but much more focused and condensed.
- >> More households have access to open space and nature. In addition, about one out of every four homes is within easy walking distance to neighborhood commercial and high-frequency public transportation. Opportunities for increased physical activity, such as walking to school, help reduce obesity and other chronic diseases.
- >> Low impact areas not feasible for development today due to lack of ground water now make economic sense through consolidation of infrastructure.
- >> Increased use of public transportation, carpooling, bicycling and walking will help 'Scenario B' achieve the lowest vehicle miles traveled per household.

19% neighborhood

7% urban

75% large lot development

How Land is Used >>

Scenario C - Distinct Cities & Towns >>

'Scenario C' focuses on maintaining individual community identity and a strong sense of place.

Rather than have Shasta County's cities and towns grow together into one large metropolitan area, individual communities focus their energies inward. Each 'micropolitan' area contains a well-defined, cohesive, and compact city or town built around an appropriately-scaled downtown and community gathering places. Surrounding open spaces serve as buffers between cities and towns and help meet the functional needs of the natural environment and nearby agriculture production.

The size of each city/town is based on a locally-defined 'build-out' area. Infill and redevelopment are used to knit respective communities together and take advantage of existing public infrastructure and services. Transportation investments are used to link cities and towns and to support a wide range of mobility choices within individual cities and towns.

Local government policies and programs work in concert to encourage more 'complete' and economically self-sufficient communities, where residents can live, work, and shop. Economic growth, population, and political clout are more evenly distributed throughout the region. Rural development is primarily located on the fringe of designated cities and towns, but clustered or grouped together in order to make the best use of infrastructure and avoid disruption to prime agricultural lands, open spaces, and environmentally sensitive areas.

Projected Land Use Pattern (2050)

What are the implications? >>

- >> Although major changes in development practices and policies are required, 'Scenario C' represents a more traditional, small town form of development.
- >> As cities and towns grow to their planned 'build-out' size, new towns may eventually need to be created to accommodate growth and development.
- >> A large portion of growth and development occurs outside and away from the valley floor. Nearly 4,000 acres of prime agricultural lands are saved from conversion to other uses compared to the 'Current Trend' scenario. Impacts to environmentally sensitive lands are reduced by nearly 43,000 acres.
- >> Residents will have greater opportunity to live, work, and shop within their hometown. Many are able to walk to work. Children are able to walk or bike to schools located within each community.
- >> Vehicle miles traveled per household, fuel use, and vehicle emissions are all substantially reduced over the 'Current Trend' scenario.

How Land is Used >>

How will my input be used? >>

Results from this survey will be used to identify a "Preferred Regional Growth Vision" for Shasta County.

- >> A final report and recommendations will be presented to Shasta County, City of Redding, City of Shasta Lake, and City of Anderson for incorporation into local plans and programs as each individual agency chooses.
- >> As a resident of Shasta County, you may use the results of the ShastaFORWARD>> process to help communicate with your elected officials on growth and development related issues that are important to you.
- >> The results will also form the basis of Shasta County's "Sustainable Communities Strategy" (required under Senate Bill 375) to reduce vehicular greenhouse gas emissions attributable to urban sprawl development patterns.

Visit www.shastaforward.com for additional information and to complete your survey electronically.

Tune into **KIXE-TV Channel 9** to learn more about the scenario planning process and find out what others are saying about ShastaFORWARD>>.

Survey Part I >>

Please complete both sides of this page, detach, and submit via the provided postage-paid return envelope. Or visit www.shastaforward.com to submit your ballot electronically. Each Performance Measure is ranked from best (1) to worst (4). Mark the future which best represents the way you want your region to grow and then make your final scenario selection below.

Performance Measure		Today	Current Trend 2050	Scenario A Rural & Peripheral	Scenario B Urban Core & Corridors	Scenario C Distinct Cities & Towns
Land Developed Ratio*	Among those lands in combined general plans designated for development, the percentage of which is needed to accommodate new growth. <i>*Includes valley floor and lower foothill areas only.</i>	 21% Developed	 48% Developed	 57% Developed	 35% Developed	 30% Developed
Environmentally Sensitive Lands Impacted*	Areas of environmentally sensitive land over which development has occurred. <i>*Includes valley floor and lower foothill areas only.</i>	 12% 17,812 Acres Impacted	 35% 50,221 Acres Impacted	 46% 65,513 Acres Impacted	 20% 28,691 Acres Impacted	 16% 22,585 Acres Impacted
Air Quality	Based on vehicle emissions.					
Fuel Consumption	Gas and diesel fuel used in Shasta County (local trips only).	 336,699 gallons/day	 737,210 gallons/day	 1,074,290 gallons/day	 606,690 gallons/day	 641,300 gallons/day
Greenhouse Gas Emission	CO ₂ emissions from on-road vehicles in tons per day.	 3.39 tons/day	 7.48 tons/day	 10.9 tons/day	 6.15 tons/day	 6.5 tons/day
Infrastructure Costs for New Development	Cost of infrastructure (streets, water, sewer, utilities).	 Not Applicable	 \$7.69 billion	 \$8.67 billion	 \$7.06 billion	 \$7.14 billion
Walkability/Transportation Choices	Percent of households within 1/4 mile of shopping, and transit stop/routes.	 12 households out of 100	 15 households out of 100	 12 households out of 100	 22 households out of 100	 18 households out of 100
Average Commute Time	Average time (in minutes) it takes to drive to work.	 00:14 Average Commute Time	 00:27 Average Commute Time	 00:24 Average Commute Time	 00:18 Average Commute Time	 00:21 Average Commute Time
Vehicle Miles Traveled	Daily vehicle miles traveled per household (2.43 people per household).	 0344 Miles Per Household	 0646 Miles Per Household	 1042 Miles Per Household	 0587 Miles Per Household	 0621 Miles Per Household
Prime Agricultural Land Impacted	Prime Ag lands over which development has occurred.	 18% 3,901 Acres Impacted	 40% 8,856 Acres Impacted	 46% 10,052 Acres Impacted	 29% 6,394 Acres Impacted	 23% 4,972 Acres Impacted
Water Consumption*	Shasta County water use based on the primary land-use related consumption categories. <i>*Note: conversion of ag lands to urban uses results in a net decrease of water use. Scenarios with highest conversion of ag lands have lowest water use.</i>	 169.1 billion - gal/day	 172.3 billion - gal/day	 151.2 billion - gal/day	 181.0 billion - gal/day	 178.4 billion - gal/day
Rank your choice for the future here >> (1 = Most Preferred, 2 = Second Choice, 3 = Third Choice, 4 = Least Preferred)
