

Shasta Regional Transportation Agency
Response to Questions on Notice of Requests for Proposals (RFPs)
for
2016 Digital Orthoimagery Collection Project
(Posted January 19, 2016)

Q1: Are there specifications for the imagery? You mention aligning with the 2010 capture, could we get those specs please?

A1: *Exact specifications will be part of the 2016 Digital Orthoimagery Collection Project RFP when it is released.*

Q2: Also to confirm: 180 square miles? That is a somewhat small area of interest so just want to make sure that is correct.

A2: *The area of interest was calculated in ArcMap and is estimated at 180 square miles covering the urbanized area of Shasta County*

Q3: Will the digital collection include terrestrial imagery, for example that collected with a Linx system?

A3: *No*

Q4: Would you be so kind as to send me a shape file of the boundary? Also, any info on the 2010 imagery that I might need would be helpful. For example, do I use the same ground control locations as were used on the 2010 project?

A4: *Information is now part of the public notice on our website along with the RFP.*

Q5: I am having trouble accessing the Project Area Boundary and Grid 2016 files. Is there any way you could send me the files in a different format?

A5: *Yes. The files can be sent via email, but please try to get them off SRTA's website first.*
