

Request for Quotes: SRTA Electric Bicycle and Scooter Purchases
Addendum
June 6, 2018

SRTA is providing this addendum to offer the following changes and clarifications to the Request for Quotes: SRTA Electric Bicycle and Scooter Purchases, issued on June 4, 2018.

1. **Need:** The presence of a throttle on the electric bicycle is no longer required, but merely *desired*. However, all bicycles are still required to be a Type-1 e-bike and include a pedal-assist. The bidder is free to specify why desired features may not be practical or wanted.
2. **Quote Format and Content:** To clarify Item 5, the services SRTA is seeking are convenient warranty support and repair. The bidder may include additional services such as training and scheduled maintenance.
3. **Quote Format and Content:** Bidders may provide quotes for one type of bike specified in the RFQ or several types. SRTA may choose from multiple vendors for the range of bike types wanted.
4. **Contact Persons:** Please do not direct responses to Michael Kuker, Assistant Transportation Planner. Daniel S. Little, AICP, Executive Director is the only contact person for this Request for Quotes.
