

Do you find it hard to get a ride to the doctor, the grocery store, or even just to visit a friend?

Would it make your life easier if there were:

1.

An Affordable Fare Program that keeps transit prices low

3.

Volunteer driver reimbursement programs that support your ability to get around the Shasta Region

2.

New transit services to more rural areas of the Shasta Region

4.

A phone app capable of remembering your unique passenger profile and would recommend the quickest trips, for which you are eligible, to your destination

These are just some ideas we are considering at the Shasta Regional Transportation Agency to improve transportation in the region, especially for older, low-income, and/or disabled individuals in Shasta, but you use these services too, so we want **YOUR** ideas and feedback!
